

Armored Glass

- Designed and manufactured using all light weight materials.
- All-plastic laminates can be manufactured and sold in large stock sized sheets which then could be cut into smaller individually sized armored windows.
- Easy frame mounting - Can be cut and or drilled to facilitate any framing system.
- Excellent residual vision after attack.
- Non spalling design
- Available in different thicknesses and Armoring Levels form B2 up to B7 / NIJ Level I to NIJ Level IV

Typical composite glazing cross-section

Glass to Polycarbonate

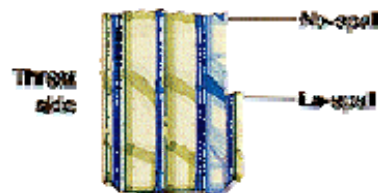

Omnilite™

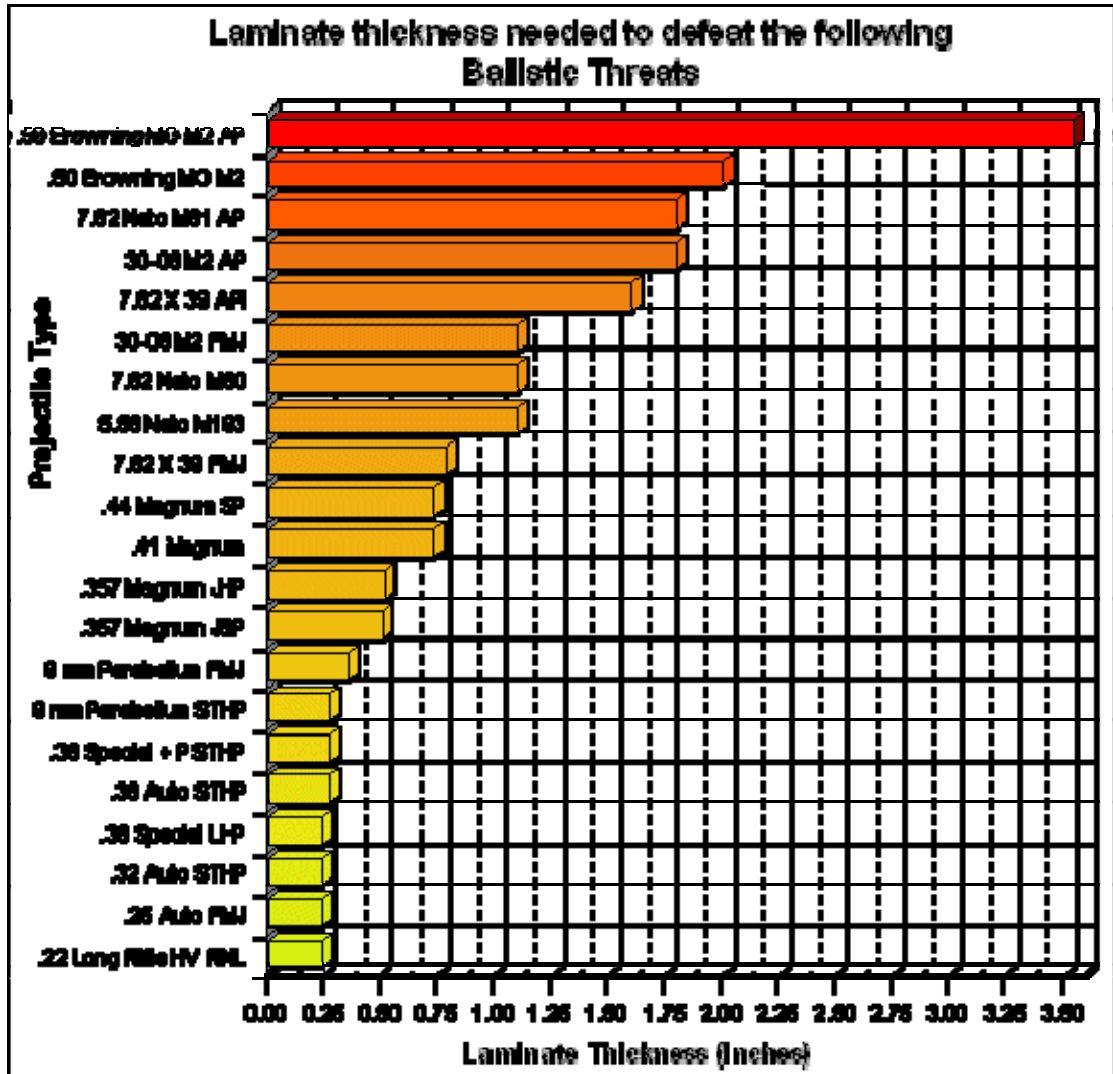

High heat and pressure bond these materials together to combine the best features of all.

Omniarmor™

- Fire resistant
- Abrasion & chemical resistant
- Ballistic & Impact resistant
