Walk Through Metal Detector

Model WMD1

Identifying and locating concealed weapons, its unique, ultra-enhanced multi-coil detection field pinpoints the exact location of any metal object within 33 distinct areas of the archway, whether on the left, right or in the center of the body, from head to toe. Bright, easy-to interpret LED pinpoint lights on the walk-through security detector's exit side, together with green and red patron pacing lights on the walk-through security detector's entrance side help improve overall traffic throughput.

200 levels of sensitivity for each zone provide greater versatility and improve discrimination.

Features include:

- Ultra-enhanced multi-coil detection field.
- Exclusive Pinpoint Detection™ technology.
- Also features unique patron pacing lights.
- 200 levels of sensitivity.
